

Slide

M351

Sliding is a favorite playground activity that encourages children into being active and playful in a fun way. This sturdy slide will delight children and help them to be brave and enthusiastic on the playground, for hours of active, healthy play. When children slide, they train their core muscles, sitting upright while sliding down. This stimulates the trunk stability,

and their sense of balance. This Sliding additionally trains the child's sense of balance which makes it possible e.g. to sit still on a chair, and to avoid falls. Sliding also helps with spatial understanding. These motor skills are important in navigating the world securely. They are the fundament of all motor skills and thus a fundamental element in physical

confidence of the child. The steps of the stair are wide and the hand grips are placed to adding security to the climb up.

Item no. M35172-3418P	
General Product Information	
Dimensions LxWxH	50x325x210 cm
Age group	2+
Play capacity (users)	3
Color options	 

Slide

M351

Slide

Physical: sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** young children develop their understanding of space, speed and distances when sliding down quickly.

Stair ladder

Physical: cross coordination is used, supporting the cooperation of the left and right halves of the brain, which is necessary for reading. For young children, spatial awareness is trained when walking stairs.

M351

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

Steps are made of HPL with a thickness of 17,8mm with a very high wearing strength and a unique KOMPAN nonskid surface texture.

The stainless-steel slides with one-piece slide bed are made of high-quality stainless-steel AISI 304.

Item no. M35172-3418P	
Installation Information	
Max. fall height	139 cm
Safety surfacing area	19.6 m²
Total installation time	6.0
Excavation volume	0.30 m³
Concrete volume	0.00 m³
Footing depth (standard)	62 cm
Shipment weight	262 kg
Anchoring options	In-ground ✓ Surface ✓

Handle is made of polypropylene PP with excellent impact strength and usable within a large temperature span.

KOMPAN GreenLine versions are designed with ultimate environmentally friendly materials with lowest possible CO2e emission factor such as EcoCore™ panels of +95% post consumer recycled ocean waste.

Sustainability Data

M351

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
M35172-3418P	254.90	1.49	76.10

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: GXY916012-3417.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025

Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO₂ calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
