

Bee Springer

NRO118

The Bee Springer has rich tactile elements and is an appealing shape. Children can rock alone or two together with the rocking movement attracting children again and again, for shorter or longer rides. Apart from its charming appearance, the Bee Springer has a tactile variation with its rubber wings, wooden body, and stainless steel hand and footholds. Tactile

variation for younger children supports their understanding of material characteristics such as weight, smoothness, temperature, flexibility, and learning which is important in risk management. The soothing, rocking movements of the bee teach spatial awareness and sense of balance, both crucial for body confidence, e.g. in avoiding falls.

Item no. NRO118-0421	
General Product Information	
Dimensions LxWxH	77x69x73 cm
Age group	3+
Play capacity (users)	1
Colour options	  

Bee Springer

NRO118

Handhold

Physical: opens more hold positions and ensures good grip, necessary for rocking intensely which trains hand and arm muscles.

Foot support

Physical: the footrest supports intensive rocking, which stimulates the senses of balance and space, fundamental for managing the world securely.

Double seating option

Social-Emotional: rocking together supports cooperation skills, and physical contact with others is great for children's wellbeing, measurable in lower cortisol levels.

Rocking spring

Physical: response to movements adds to spatial awareness and sense of balance which are fundamental motor skills.

Cognitive: trains the understanding of cause and effect: when I move my body, the spring responds with movement.

Theme

Cognitive: suggests a theme and supports dramatic play, which stimulates language and communication skills.

Bee Springer

NRO118

All organic Robinia products by KOMPAN are made of Robinia wood which is sourced from sustainable plantation farms. On request it can be supplied as FSC® Certified (FSC® C004450).

The paint used for coloured components is water-based, which is environmentally friendly and has excellent UV resistance. The paint is compliant with Australian Standards.

Handles and footrests are made of high-quality stainless steel and equipped with moulded on PUR handholds and footsteps. The PUR footrests are designed with grooves to make the surface slip-resistant.

KOMPAN's springs are manufactured from high-quality spring steel. The springs are cleaned by phosphating before being painted with epoxy primer and polyester powder coating. The springs are fixed by unique anti-pinch fittings for maximum safety and longevity.

Membranes consist of friction-proof rubberized material of conveyor belt quality with excellent UV resistance. Tested and comply with strict PAH requirements. Embedded is a four-layered armouring made of woven polyester to ensure high vandalism resistance.

Robinia products are available in three different wood treatment options; untreated Robinia wood or brown painted with a pigment that maintains the wood colour and coloured version with paint of selected components.

Item no. NRO118-0421	
Installation Information	
Max. fall height	60 cm
Safety surfacing area	7.2 m²
Total installation time	1.9
Excavation volume	0.17 m³
Concrete volume	0.00 m³
Footing depth (standard)	42 cm
Shipment weight	42 kg
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
Membrane	2 years
Robinia Wood	15 years
Spare Parts Guarantee	10 years
Springs	5 years
Stainless Steel Components	Lifetime

Sustainability Data

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
NRO118-0421	83.90	2.22	30.00

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Nature play

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
