Let's play

This play-dense five tower play structure offers play variation and a high play capacity. The combination will make children play for a long time and want to come back again and again. On ground level, three different play panels create each their fun play retreats for quieter play. The many different ways of climbing up on the platforms and the spacious net link make

play explorations worthwhile. They additionally train the child's cross-coordination and muscles. The thrilling wobbly bridge intensely trains the sense of balance, again benefiting the child's motor skills broadly, as well as the body confidence. There are thrilling egresses for both more timid and wild players, from the slide to the dare-devil fireman's pole. Playing

here guarantees training of all major physical development areas. It also guarantees fun play with friends, stimulating social-emotional developmental domains.
