NRO207

KOMPAN Robinia sunshades are designed to provide shaded play areas on sunny days. Sunshades are often used to cover areas where kids are sitting still for a longer time like for example sandboxes and playhouses. The shading is elevated by posts in each corner and the sail is attached to the post by a nylon rope and tightened in a V-track. The high-

density polyethylene material is very durable, we do however recommend to take down the sail in heavy wind and during winter. Light rain will run off while during heavy rain the water will pass through the sail material to prevent damages. As an accessory KOMPAN offer wind brakers in the same material that placed vertically between the post will provide shelter

to the shaded area.

KOMPAN 的所有有机刺槐产品均由 刺槐木材制成，来自欧洲的可持续环保木材。可根据要求提供 FSC® Certified (FSC® C004450)

The sail is made of 100% High Density Polyethylene HDPE in beige color. The density of approximately 320 g/m² ensures a high durability for outdoor usage.

All fixation points are equipped with steel brackets to ensure strong connection to the nylon rope used for tightening.

The rope is attached to the Robinia post by a stainless-steel eyebolt and tightened by a nylon bracket with wedge track. The system ensures the sail is easy to set-up, tighten and take down again.

The HDPE sail is authorized to use the UV-label grade 10 in accordance with UV standard 801 under the test report number 738740-1. See certificate on www.master.KOMPAN.com
