

Labyrinth, 2 Rooms

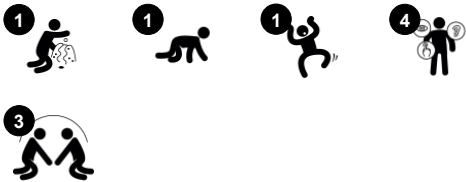

M63272

Toddlers do have more fun! Labyrinth, 2 rooms will provide hours of fun for young children. Children will enjoy moving their bodies in and out as well as around and around the structure. This is welcomed by the thoughtfully placed rubber knee-protectors placed in the crawl-through openings. These support important physical as well as spatial skills. The 360

design also supports social interactions through window and door spaces as well as through peek-a-boo holes. The cooperation going on here supports the development of social-emotional skills. Open-ended sensory elements such as the megaphone stimulate the understanding of cause and effect, stimulating cognitive development.

Theme

Cognitive: suggests a theme and supports dramatic play, which stimulates language and communication skills.

Desk

Social-Emotional: fine meeting place and a space creator. Sharing and cooperation from both sides to create a social scenario that supports communication and cooperation.

Bench

Social-Emotional: gathering, cooperating or taking a break from play - all train social skills.

Megaphone

Social-Emotional: inspires communication and turn-taking skills. **Cognitive:** distortion of sound evokes curiosity and stimulates an understanding of cause and effect.

Crawl-through hole

Physical: the hole allows for climbing and crawling through, developing cross coordination, proprioception and spatial awareness. **Social-Emotional:** cooperation and turn-taking when passing one another. **Cognitive:** understanding space, shape and measures when seeing if the body can fit through the hole.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
