

# Double Tower with Spider Net

NRO2009

Item no. NRO2009-1021

**General Product Information**

Dimensions LxWxH	27'0"x22'3"x13'8"
Age group	5 - 12
Play capacity (users)	27
Color options	

The voluminous Double Tower with Spider Net is an irresistible play attraction for children. Its varied play corners and diverse physical play activities attracts children again and again, for a long time. The Spider Web Net trains the children's cross-coordination, balance and spatial awareness with its inclined net rungs. All of these motor skills are crucial when

managing obstacles and traffic safely. The balance beam and fireman's pole both appeal to dare-devils with their stomach-tickling height and speed. These play events train the balance and sense of space. Furthermore, jumping down from the fireman's pole helps to build children's bone density. This is particularly important as children build bone for life

primarily in the early years. The accessible stairway leads children with a range of abilities up to the slide. Going down, children are looped back to the stair entrance, which is also a meeting place.

NRO2009

## Net bridge

**Physical:** children develop spatial awareness in the open net. **Social-Emotional:** interaction with children outside, socializing. Cooperation and consideration, e.g. when passing others.

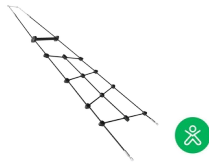

## Side desk

**Social-Emotional:** fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

## Fireman's pole

**Physical:** coordination is supported when going down, as well as arm and core muscles. Landing strengthens bone density, which is built for life in early childhood. **Social-Emotional:** turn-taking and risk-taking.

## Climbing net

**Physical:** the inclined net supports the upward climbing movement of the body. The net supports cross-body coordination, which impacts coordination of the right and left part of brain, fundamental for other skills such as the ability to read. The asymmetry of the net challenges the children's climbing.

## Slide

**Physical:** sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking.

## Vertical spider net

**Physical:** cross coordination is supported when creeping and crawling through, over and across the net. This also supports the cooperation of left and right sides of the brain, important for other skills like reading. The core, arm and leg muscles are strengthened. **Social-Emotional:** taking a break together in the net and waiting for others to cross supports social abilities such as cooperation and communication.

## Accessible stairway

**Physical:** climbing the accessible stairway is for all and supports cross coordination as well as arm and leg muscles. For young children, walking stairs and alternating feet is developed. **Social-Emotional:** room for active breaks and adult helpers. An inclusive space.

NRO2009

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

The paint used for colored components is water based environmental friendly with excellent UV resistance. The paint is in compliance with EN 71 Part 3.

The Robinia products are designed with a KOMPAN color concept with a number of different standard colors. The wood can also be supplied as untreated or with brown painted with a pigment that maintains the wood color.

Item no. NRO2009-1021	
Installation Information	
Max. fall height	6'10"
Safety surfacing area	811ft²
Total installation time	36.4
Excavation volume	3yd³
Concrete volume	0.42yd³
Footing depth (standard)	3'3"
Shipment weight	3768lbs
Anchoring options	In-ground ✓
Warranty Information	
Robinia Wood	10 Years
Ropes & nets	10 Years
Spare Parts Availability	10 Years
Stainless steel components	Lifetime

The product/activities are preassembled from the factory to ensure all safety requirements are considered.

The hardware is made of stainless steel or galvanized steel to ensure durable connections with a high corrosion resistance.

Elevated activities 5	Accessible elevated activities	Accessible ground level activities	Accessible ground level play types
Present	3	1	1
Required	3	2	2

ASTM  
F1487  
compliant

# Sustainability Data

NRO2009

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
NRO2009-1021	938.10	0.65	7.30

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Nature play

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
