Mini Hammock

PCM804

Item no. PCM804-0902	
General Product Information	
Dimensions LxWxH	119x40x75 cm
Age group	1+
Play capacity (users)	1
Colour options	●

Look how it moves! The Mini Hammock is a lot of play in a little space and instantly attracts toddlers to engage in participation, again and again. Children love play activities that respond to their movements. Swaying in the hammock helps children to develop coordination and a sense of balance which are fundamental for all other motor skills in infants and toddlers. The soothing, swaying movements add a tranquil feeling. Pushing friends gently back and forth and learning to take turns are important social-emotional skills for children. For toddlers, there is a cognitive aspect to this type of play as they begin to develop concepts of cause and effect related to their bodies and objects.

Mini Hammock

PCM804

Steel posts are galvanised inside and outside with powder-coated top finish. This provides ultimate corrosion resistance in all climates around the world.

Hammock seat is made of PUR. All components retain their properties in the temperature range of -30°C to 60°C. All materials are UV stabilised to a maximum without the use of heavy metal stabilities.

KOMPAN's unique swivel suspensions allow for both swinging and rocking movement when children play on the hammock. The inside housing is made of stainless steel, and both the bushing and bearing rod is made from brass alloy. The outside cover is made of soft TPV rubber, and the entire swivel is attached to the steel post by an aluminium connector.

Item no. PCM804-0902		
Installation Information		
Max. fall height		23 cm
Safety surfacing area		11.2 m²
Total installation time		2.7
Excavation volume		0.07 m³
Concrete volume		0.02 m³
Footing depth (standard)		85 cm
Shipment weight		35 kg
Anchoring options	In-ground	✔
	Surface	✔
Warranty Information		
Post		10 years
Spare Parts Guarantee		10 years

Ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made from +95% post-consumer materials and is inductively melted onto each strand.

Sustainability Data

PCM804

Cradle to Gate A1-A3	Total CO_2 emission	CO_2e/kg	Recycled materials
	kg CO_2e	kg CO_2e/kg	%
PCM804-0902	88.40	3.66	39.10

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

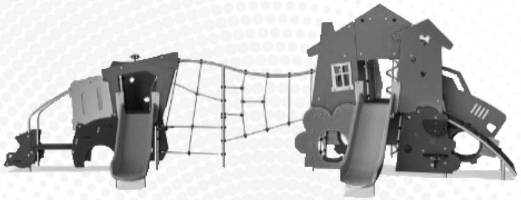
Validation of CO_2 calculation method
BUREAU VERITAS
HSE Denmark A/S

Verification of CO_2 calculation of: Themed play systems



Data version no. 2023-10-05

The CO_2 calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Themed play systems" represented by item no.: MSC641100-3717P.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
