M952

The Little Spider Swing will attract children again and again. It offers a lot of play in a little space. Swinging the bird's nest seat develops children's sense of balance and coordination, which are fundamental for all other motor skills. There is also a cognitive aspect to this type of play, as toddlers develop the concept of cause and effect related to their bodies and objects.

The nest seat can fit multiple users, making it a social experience where children can play together and cooperate. The seat caters for all abilities and most ages allowing it to be a shared experience. Pushing each other and taking turns teaches children important social-emotional skills. It can also be used individually for a more relaxing swing. It is possible to lie,

sit and stand on the seat, which all support the development of arm, leg, and core muscles as well as building bone density when jumping off.
