

Double Web Climber

NRO833

The Double Web Climber is quite a challenge, that trains basic motor skills. Children use their cross-coordination, proprioception and their muscles when they embark on the net and climb over the sturdy top beam to the other side. The wide spacing between the rungs is great for leg, arm and core muscles. The varied meshes allow for different climbing styles and

more children climbing together. Children get to use and expand social-emotional skills such as turn-taking and negotiation. The top beam is the perfect destination for a break with friends. Navigating up and down is good for training the sense of space which helps children estimate distances and risks in street traffic.

Item no. NRO833-1001	
General Product Information	
Dimensions LxWxH	208x232x183 cm
Age group	4+
Play capacity (users)	6
Color options	 

Double Web Climber

NRO833

Top beam

Physical: climbing over the top beam demands good spatial awareness and involves risk taking. **Social-Emotional:** fine destination for a break with friends.

Height

Social-Emotional: children develop courage and self-regulation when being up high. This positively affects self-confidence.

Climbing net

Physical: the inclined net supports the upward climbing movement of the body. The net supports cross-body coordination, which impacts coordination of the right and left part of brain, fundamental for other skills such as the ability to read. The asymmetry of the net challenges the children's climbing.

Double Web Climber

NRO833

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

Nets and ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated in order to create a strong connection between steel and rope which leads to good wear resistance.

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

Item no. NRO833-1001	
Installation Information	
Max. fall height	200 cm
Safety surfacing area	22.9 m²
Total installation time	4.3
Excavation volume	1.91 m³
Concrete volume	0.15 m³
Footing depth (standard)	100 cm
Shipment weight	206 kg
Anchoring options	In-ground ✓

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
NRO833-1001	139.00	0.84	8.60

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Nature play

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
