The great Toddler Oasis with Sand Desk absorbs children in construction play for hours and hours, again and again. The podium is roomy and can be played from all sides. This allows for more children in action, in spite of the small foot-print. The Sand Des is the main attraction: the sieve and tube in each their way leads sand to the ground level. This is an

eternal source of wonder for young children. It develops their understanding of object permanence: that things don't necessarily cease to exist, when you cannot see them anymore. For cognitive development this is fundamental. The shovels can work horizontally or vertically, transporting material from side to side or up and down. This trains spatial

awareness as children communicate and negotiate their explorative play adventures, building social skills.
