The rounded shapes of the Inclusive Swing Seat attract children of all ages and abilities. The self-initiated movement, the great ergonomic and the feeling of security while swinging will make children return again and again for more play. For children who need assistance entering, or support for their seated position, the one-hand operated harness offers

comfortable grips and security. The upright swinging position allows all children eye contact with their care giver and a view of the surroundings while swinging. The trill of independent play is ensured by the self-starter function which allows for pushing and pulling the swing into motion. This amplifies the freedom of movement and the feeling of

achievement for children who cannot otherwise swing without assistance. When swinging, children train the sensory system of balance, focal tracking, and muscle tonus. But not least, for all children, swinging is one of the most beloved play activities. Participating in the joy of swinging may be the biggest social-emotional thrill of the playground.

Inclusive Seat, H:2.5m, 4-Chain

Inclusive Seat

身体素质 : balance, coordination and spatial awareness are developed when swinging.

These are necessary skills for judging distances and navigating. The swinging movement trains arm, leg and core muscles.

社交情感 : 直立摆动的姿势可以让儿童与看护人有目光接触。 **认知能力** : 在荡秋千时, 让幼儿理解因果关系, 掌握节奏和思维技巧。

Harness

身体素质 : The harness can be operated with one hand and is clicked open and locked. The raised position of the harness allows for easy transfer in and out of the seat. **社交情感** : The harness has several grip supports to ensure the feeling of security when swinging.

Front chains

身体素质 : 推拉链条需要协调能力, 可以训练肌肉力量。 **社交情感** : Being able to swing independently amplifies the feeling of achievement for children who cannot otherwise swing without assistance.

认知能力 : 孩子可以通过肢体动作来影响运动, 这一点可以训练他们的逻辑思维和对因果关系的理解。对于无法独立荡秋千的儿童来说, 能够独立荡秋千会增强他们的成就感。

Inclusive Seat, H:2.5m, 4-Chain

SW990207

The inclusive swing seat made of recyclable polyethylene (PE) using 33% post consumer materials. The seat is molded in one piece and equipped with a drain hole to avoid water accumulation. The ergonomic design enables a safe and comfortable seating position.

The Harness is made of molded recyclable polyethylene (PE) made from 33% post consumer materials. The harness utilizes a stainless-steel torsion spring which makes the harness stay in in all position to secure easier entry and exit of users. the harness lock is designed with a one-handed operation slider made from stainless steel.

The front bumper is made with a core of strong polypropylene (PP) with a softer outer layer of thermoplastic rubber (TPE) and the rear bumper of 8mm thick EPDM membrane. The soft, shock absorbent bumpers with nonslip surface makes the swing seat extremely safe to use by caretakers.

The seats are available with chains made of either Ø6 hot dip galvanized steel with a surface treatment according to ISO1461 or with Ø6 high-quality stainless-steel chains. Furthermore, the swing seat is available with the unique KOMPAN self-starter function with four chains yolk suspension.

The KOMPAN Inclusive swing seat is available in six different color combinations to ensure it fits into any playground color style. The seats fit all KOMPAN swings with steel crossbeam in height 2,5m and 3,0m.

KOMPAN GreenLine versions are designed with ultimate environmentally friendly materials with lowest possible CO2e emission factor such as EcoCore™ molded PE parts of 33% post-consumer recycled ocean waste.
