The water channel is a playground classic that will inspire children for hours of fun sand play, again and again. The Water Channel allows for materials to be held, stored or transported through the half pipe. This is a fantastic support for explorative play and children's cognitive and creative skills. With room for many children the water channel invites cooperation, negotiation

and the child's social-emotional development. Getting children to negotiate is hard to teach, but easily achieved with sand play at the Water Channel.
