The cover protects all the moving parts from vandalism and entrapments. The cover is made of 5mm rotomolded LLDPE, Linear low-density polyethylene, with excellent impact strength and usable within a large temperature span.

The resistance unit and all mechanical stops are hidden in the fully closed cabinet. As a result, entrapment is not possible, making it extremely safe to use and providing protection against the elements. The products are EN 16630 certified and comply with the ASTM F3101 for unsupervised outdoor fitness equipment.

The seat is made of Polyurethane Rubber and has a steel insert plate that is electro-galvanized. The steel plate connects the seat to the frame. This construction makes the seat extremely durable against wear & tear and still very comfortable for a great user experience. The seat is positioned at a height of 46 cm, a comfortable height that makes the transfer from a wheelchair easy.

The ergonomically shaped handles have different grip areas for adaptable training, allowing people from 140 – 205 cm tall, to perform the exercise ergonomically correctly and at the same time allowing multiple different exercises. The handles are Aluminum cast and have a diameter of  $\varnothing$  33mm. The Grip Powder coating, used on the support handle, is highly durable against wear and tear, offers isolation, and simultaneously gives users an outstanding grip during their workout.

The 80kg weight stack is fully covered and can be adjusted with a rotatable handle in 16 steps of 5 kg. The smart selector system is intuitive in use and patent-pending. No pins that get lost or get stuck, you simply pull and rotate the handle to change to select a different weight.

The input shaft is  $\varnothing$ 101,3 x 2,9mm S355 Hot Dip Galvanized and Powder-coated steel. The bearing house is Cast Aluminum (EN AB-44100 / EN AB-AISI12(a)) with self-aligning sealed ball bearings. An extremely strong and durable construction
