The steel's inside surfaces are hot-dip galvanised, and the outside with lead-free zinc. Galvanisation has excellent corrosion resistance within outdoor environments and is low maintenance.

High-quality polycarbonate with a thickness of 8mm. The graphic prints are added by a unique multi-layer print process where the inner layer is the image and the outer transparent layer functions as protection. Both PC panel and the water-based lacquer are UV stabilized to prevent fading.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
