

# Agility Trail 5

NRO864

Item no. NRO864-1001

### General Product Information

Dimensions LxWxH	1129x188x210 cm
Age group	6+
Play capacity (users)	15
Colour options	 

The Agility Trail 5 is a challenge that children of ages 6 to 12 will want to take on. The variation in hanging, climbing, and balancing activities will make children come back, again and again, to test their abilities while having fun! There is a variation in fixed and moving balancing logs, and the combination of overhead and tight rope walks offer great play challenges. Balancing

across the swaying ropes and rolling logs of the Agility Trail 5 train balance, strength, and coordination. It is also a great course for confidence building, or simply playing 'Don't touch the ground'. It is made of natural Robinia timber, which provides an organic structure that can either blend into or stand out from your surroundings. Children can touch and feel the

timber while playing, observing how nature inspiration interacts with the built environment.

## Climbing wall

**Physical:** balancing and climbing the climbing wall develops cross coordination, which supports cross-modal perception, necessary for other skills such as reading.

## Balance ropes

**Physical:** the balance training here is unmistakable. Swaying on the upper rope and balancing on the swaying lower rope makes trains balance and trunk muscles. **Social-Emotional:** cooperating with friends on walking over the swaying ropes is a true cooperation task that takes teamwork and tolerance.

## Teardrop handles

**Physical:** hanging with the arms and swinging the body from one handle to the next develops upper body muscles and cross coordination. **Social-Emotional:** passing others when climbing through trains turn-taking skills and consideration.

## Dynamic beam

**Physical:** the child practices balance intensely when staying on the spinning beam. This is a challenging and thrilling activity and develops the child's risk-taking skills in a safe and sound way, close to the ground. **Social-Emotional:** cooperation and consideration when spinning together with others.

## Balance beam

**Physical:** trains the sense of balance, fundamental for all other motor skills that makes it possible to navigate the world confidently and securely. **Social-Emotional:** turn-taking skills and negotiation when crossing each other on the beam. Room for a seated rest and exchange.

All organic Robinia products by KOMPAN are made of Robinia wood which is sourced from sustainable plantation farms. On request it can be supplied as FSC® Certified (FSC® C004450).

Nets and ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated to create a strong connection between steel and rope, which leads to durable weather resistance.

The teardrop handle has been designed in such a way that it can be used as a handle or a footrest. The shape and diameter of the handle is optimal for kids.

The climbing panel is made from 19mm EcoCore™, which is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of a core produced from 100% recycled material.

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

Item no. NRO864-1001	
Installation Information	
Max. fall height	60 cm
Safety surfacing area	49.0 m²
Total installation time	15.8
Excavation volume	1.53 m³
Concrete volume	0.88 m³
Footing depth (standard)	100 cm
Shipment weight	985 kg
Anchoring options	In-ground ✓
Warranty Information	
Robinia Wood	15 years
Ropes & Nets	10 years
Spare Parts Guarantee	10 years
Stainless Steel Components	Lifetime
Stainless Steel Components	Lifetime

# Sustainability Data

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
NRO864-1001	153.30	0.21	3.60

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Nature play

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
