**KOMPAN**  
Let's play

The Robinia Play & Learn Blackboard is a great creativity attractor, that children return to again and again. It appeals to children's dramatic play, e.g. playing school. It also stimulates creativity in drawing. Due to the two sides of the blackboard bigger groups can draw together, e.g. in an outdoor classroom. The richness in tactile detail with acabus, clock, bell

and number board train the fine motor skills and hand-eye coordination. The clock stimulates the understanding of time and measures. The clock makes it possible to leave a mark with sound, which trains the logical thinking skills of the youngest. The clock and bell are used intensely in dramatic play in play-tests. The number board inspired play-

counting. Drawing and play-writing were essential parts of the blackboard play. Play-school games are known to stimulate children's interest in learning and readiness for school.
