

Steep Slope

MSV606

The steep slope is a fantastic motivator for play that helps to build strength, balance and coordination for young children. In addition, this challenging structure will help the youngest children assess risk and enrich their cognitive skills and decision-making. The intentional design helps children to feel successful and competent, while also supporting social skills

such as turn-taking and decision-making. These skills are important overall health and well-being. Children can gain a wealth of skills through play on the steep slope, as they practice their balance and strengthen their muscles, taking turns with friends and sharing in games that help them to enjoy success. The low slope will help to extend playtimes for

healthy development and great fun.

Item no. MSV60600-0201	
General Product Information	
Dimensions LxWxH	3'11"x1'10"x1'8"
Age group	6m - 4
Play capacity (users)	2
Color options	

Steep Slope

MSV606

Bouncy slope

Physical: sense of balance and space are supported when moving up. Cross coordination can be developed when crawling over. Bone density is strengthened when jumping off.

Handholds

Physical: gripping the handle to pull up your body develops hand-eye coordination and muscles.

Steep Slope

MSV606

Seats of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled material.

Membranes consist of friction-proof rubberized material of conveyor belt quality with excellent UV resistance. Embedded is a four-layered armoring made of woven polyester. The armoring and the two surface layers result in a total thickness of 9 mm.

Item no. MSV60600-0201		
Installation Information		
Max. fall height	1'4"	
Safety surfacing area	187ft²	
Total installation time	3.5	
Excavation volume	0yd³	
Concrete volume	0yd³	
Footing depth (standard)	0'0"	
Shipment weight	60lbs	
Anchoring options	Surface	✓
Warranty Information		
EcoCore HDPE	Lifetime	
Membrane	2 Years	
Spare Parts Availability	10 Years	

Elevated activities 0	Accessible elevated activities	Accessible ground level activities	Accessible ground level play types

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
MSV60600-0201	41.00	1.42	67.50

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Themed play systems

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Themed play systems" represented by item no.: MSC641100-3717P.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
