The Toddlers' castle offers imaginative, physical, social and cognitive stimulation in abundance. The castle attracts the children through its imaginative design and makes it recognizable from afar. Another side of the structure presents a small table for sand play or social interaction. Sliding is additionally a favourite activity among children even at small

ages. The sensation of whizzing through air makes for some unique laughter among the children. Many play values around the structure are found in the form of tactile elements.

## Slide

**Physical:** sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** young children develop their understanding of space, speed and distances when sliding down quickly.

## Stairway

**Physical:** climbing the stairs supports cross coordination as well as arm and leg muscles. **Social-Emotional:** room for active breaks and adult helpers.

## Bubble Window

**Social-Emotional:** invites interaction between outside and inside. **Cognitive:** distorts the sound of the voice, developing logical thinking.

## Desk with ring

**Social-Emotional:** a place for meeting and exchanging. **Creative:** sand and construction play encouraged with sieve in desk.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
