

Exercise Net, Small

COR39301

The Exercise Net offers a great climbing experience and adds a centerpiece to any playground. Use the climbing membranes and ropes to fast-track to the yellow sphere towards the peak of the net. The complex rope challenges make the children want to come back for more climbing adventures again and again. The sturdy support ropes with black

handgrips invite tight rope walking, seating or lying. The climbing net rungs aid a responsive ascent, training children's cross-coordination, agility and concentration as they attempt their climb to the top. These motor skills support e.g. traffic safety. The rubber membranes offer a tough climb to the top. The training of hand, leg, and core muscles when clinging onto the

ropes can be challenging. The net responds with every movement and stimulates communication and social play as the children take turns.

Item no. COR393011-1101

General Product Information

Dimensions LxWxH	365x365x280 cm
Age group	3+
Play capacity (users)	25
Colour options	

Exercise Net, Small

COR39301

Mast

Physical: the slightly swaying mast stimulates children's muscles and motor skills when they hold tight climbing the net. **Social-Emotional:** children develop courage and self-regulation when climbing up high. This positively affects self-confidence.

Transparency

Social-Emotional: the transparency makes cooperation and communication possible, which are essential life skills for children to learn.

Bouncy net meshes

Physical: agility, balance and coordination as well as spatial awareness are supported when bouncing, climbing and sitting in the net. **Social-Emotional:** the bouncing, swaying net appeals to empathy and cooperation. **Cognitive:** physical memory, logical thinking, concentration.

Membrane climber

Physical: develops cross coordination and leg, arm and hand strength. **Social-Emotional:** the inclination makes climbing feel secure, especially for younger children.

Big meshes

Physical: the big meshes allow for climbing and crawling, supporting proprioception, cross coordination and spatial awareness. **Social-Emotional:** allow more children being seated together, sharing.

Exercise Net, Small

COR39301

Corocord ropes with 19mm+ diameter are known as a 'Hercules' rope type which is formed from galvanised six-stranded steel wires. Each strand is tightly wrapped with PES yarn, which is melted onto each individual strand. Ropes are highly wear-and vandalism-resistant and can be easily replaced on-site if needed.

Designed to allow the typical function of rope play structures to move Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector. Our clamps are safe, durable and vandalism-proof.

Ropes are coated with PUR. This coating is flexible and adds protection against abrasion. Due to the different haptics and larger surface, the coated parts motivate to intense play and use of the trampoline effect.

Item no. COR393011-1101	
Installation Information	
Max. fall height	100 cm
Safety surfacing area	40.6 m²
Total installation time	7.7
Excavation volume	3.20 m³
Concrete volume	2.24 m³
Footing depth (standard)	110 cm
Shipment weight	233 kg
Anchoring options	In-ground ✓
Warranty Information	
Corocord (Hercules) Rope	10 years
Membrane	2 years
S-Clamps	10 years
Spare Parts Guarantee	10 years
Steel post HDG	Lifetime

Corocord membranes consist of friction-proof rubberised material of conveyor belt quality with excellent UV resistance. Tested and compliant with REACH requirements for PAH. Embedded is a four-layered armoring made of woven polyester. The armoring and the two surface layers result in a total thickness of 7.5 mm.

In the centre of the net is the mast which is made of high-quality seamless steel and creates an oscillating support structure which is statically favourable and equalises the oscillations in the net. The masts are hot-dip galvanised as standard, with the design option of additional powder coating.

For installations using rubber surfacing the turnbuckle protectors are to be ordered separately.

Sustainability Data

COR39301

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
COR393011-1101	646.10	3.18	48.40

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Corocord

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
