

WeHopper

PCM159

Item no. PCM159-1001

General Product Information

Dimensions LxWxH	266x43x164 cm
Age group	6+
Play capacity (users)	2
Colour options	  

WOW! The thrilling activity of rotating, rocking and cooperating with a friend is hugely appealing to children of all ages. The WeHopper is perfect in size for young children, and their enthusiasm in mastering the activity is pure play. When pushing with the feet and pulling with the arms, the WeHopper is set into motion. This trains coordination skills as well as

muscles. The handholds allow for different grip heights so that a span of ages are able to get a firm grip. When rotating, the children stimulate their sense of balance, which is fundamental for all other motor skills and involves the ability to for instance sit still on a chair. The coordination of movements for the individual child, and not least the coordination of

movements together with a friend, takes concentration and body mastery. This stimulates social skills, and it builds confidence in movement, supporting self-efficacy.

PCM159

Rotation

Physical: pushing or pulling it into motion, children use their muscle strength and strengthen their cardio. The rotation develops the sense of balance and space when enjoying the ride. **Social-Emotional:** listening and negotiating how slow or fast to go, children develop their empathy and cooperation skills.

Handhold

Physical: the vertical handgrips ensure a firm grip at different heights, necessary for rocking intensely. This trains hand and arm muscles.

Rocking together

Social-Emotional: the possibility of rocking two together trains cooperation skills. Consideration of others when rocking.

Rocking movement

Physical: response to movements adds to spatial awareness and sense of balance. These are fundamental motor skills that help the child's ability to sit still on a chair which takes a good sense of balance. **Cognitive:** trains the understanding of cause and effect: when I move my body, the spring responds with movement.

PCM159

The metal parts are made of high quality steel, hot dip galvanized inside and outside with leadfree zinc. On the top part there is an additional layer of powder coating. This ensures both excellent corrosion resistance and colorful design expression.

The seats are with a structural core of PP and the softer outside layer of black TPV. TPV has high impact resistance across a wide temperature span which also ensures vandal resistance in all locations.

The large rounded handles are welded directly onto the main pipe to ensure high durability of the dynamic product.

The rocking movement is controlled by a heavy duty scaled rubber torsion spring element. The rubber element ensures a damped movement up and down.

Heavy duty engineered bearing system with two single row deep groove high quality ball bearings with rubber seals. The fully closed bearing construction is lifetime lubricated.

The product is equipped with a friction brake placed inside the bearing house. The brake is adjusted to stop within two revolutions.

Item no. PCM159-1001

Installation Information

Max. fall height	140 cm
Safety surfacing area	46.1 m ²
Total installation time	2.9
Excavation volume	0.50 m ³
Concrete volume	0.29 m ³
Footing depth (standard)	100 cm
Shipment weight	185 kg
Anchoring options	In-ground ✓ Surface ✓

Warranty Information

Bearing construction	5 years
Hot dip galvanised steel	Lifetime
Movable parts	2 years
Spare parts guaranteed	10 years
Swing seat	10 years

Sustainability Data

PCM159

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
PCM159-1001	240.20	2.83	44.10

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: GX916012-3417.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
