The steep slope is a fantastic motivator for play that helps to build strength, balance and coordination for young children. In addition, this challenging structure will help the youngest children assess risk and enrich their cognitive skills in risk assessment and decision-making. The intentional design helps children to feel successful and competent, while also

supporting social skills such as turn-taking and decision-making. These skills are important overall health and well-being. Children can gain a wealth of skills through play on the steep slope, as they practice their balance and strengthen their muscles with friends, as they take turns and share in games that help them to enjoy success. The low slope will help to

extend playtimes for healthy development and great fun.
