

Embankment Slide, long

M385

WOW! The long, classic KOMPAN embankment slide invites fun play activity for all children and those childish at heart. On the embankment run loop, children will run up and slide down again and again. Sliding on the embankment slide is an extra fun experience, as friends can run up or down next to their friends who are using the slide. There is room

for many and for different ages and abilities. The embankment hill is a great place for rolling or running, too. This is fun, playful cardio training for children. When children slide, they are training their core muscles, sitting upright while rolling down. This stimulates trunk stability, important for avoiding back and neck pains, a growing problem in children due to

increasingly sedentary lifestyles. Running uphill or downhill, children train their balance and coordination as well as their muscle strength. They develop risk management skills, too, holding back or letting go downhill.

Item no. M38570-3418P	
General Product Information	
Dimensions LxWxH	61x407x67 cm
Age group	3+
Play capacity (users)	3
Colour options	

Embankment Slide, long

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

The stainless-steel slides with one-piece slide bed are made of high-quality stainless-steel AISI 304.

Handle is made of polypropylene PP with excellent impact strength and usable within a large temperature span.

Item no. M38570-3418P	
Installation Information	
Max. fall height	100 cm
Safety surfacing area	19.0 m²
Total installation time	4.9
Excavation volume	0.27 m³
Concrete volume	0.00 m³
Footing depth (standard)	61 cm
Shipment weight	219 kg
Anchoring options	In-ground ✓
Warranty Information	
EcoCore HDPE	Lifetime
Spare parts guaranteed	10 years
Stainless steel slide	10 years

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: GXY916012-3417.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
