

# Balance Board

FSW231

The reactive balance board resembles situations where the contact with the surface suddenly gets unstable. The Balance board mimics situations that occur in metros, buses or on slippery surfaces. It can be used on one or two feet with or without support, but for even more challenging exercises the signs on the high posts can be used. By alternatingly

touching the different symbols in a pre-defined pattern with right and left hand both full body balance, coordination and cognition can be challenged.

Item no. FSW23100-0902

### General Product Information

Dimensions LxWxH 2'10"x2'11"x6'7"  
Age group 13+  
Play capacity (users) 1

# Balance Board

FSW231

The HPL board is 586mm x 586mm and can move 70mm in all directions. High-pressure laminate plates (HPL) have a molded-in non-skid surface. HPL is a homogenous material with a very high wear resistance.

The connectors are made of die-cast aluminium, specially alloyed for the outdoor environments and heavy usage. The screws attaching the connectors are stainless steel and protected by zinc washers.

Posts are made of 101.6 x 2mm, pre-galvanized carbon steel and powder coated, a great protection to all conditions.

Item no. FSW23100-0902

## Installation Information

Max. fall height	0'5"
Safety surfacing area	84ft <sup>2</sup>
Total installation time	4.8
Excavation volume	0.27yd <sup>3</sup>
Concrete volume	0.14yd <sup>3</sup>
Footing depth (standard)	2'11"
Shipment weight	259lbs
Anchoring options	In-ground ✓ Surface ✓

## Warranty Information

Bearing construction	5 Years
EcoCore HDPE	Lifetime
Post	10 Years
Spare Parts Availability	10 Years
Stainless steel components	Lifetime

The information sign is made of a PA6 (Polyamide) and shows the most relevant exercise and a QR code. When scanned the QR code will link to an animated illustration of the exercise and offers the possibility of downloading the KOMPAN sport & fitness App, which will provide a large amount of exercises and workouts.

All KOMPAN fitness products are compliant with the ASTM F3101 & EN16630 Outdoor Fitness Standards. Load tests are performed as a static test by adding dynamic factors as well as safety factors to the specified load of 78kg per user. A product intended for 1 user is loaded with 420kg.

The balance board is connected to the posts with 506mm long stainless steel (AISI304) chains with 6mm links. The swivels used are made of PUR coated sintered stainless steel with bronze bearings, providing a strong and smooth movement.

**ASTM  
F3101**  
compliant

# Sustainability Data

FSW231

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
FSW23100-0902	279.60	3.38	43.40

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Fitness

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
