The Spinner Plate is a slick, inclined spin that attracts children immensely, again and again. The secret of the success is the immediate response to the child's movements: When the child kick off from the ground and sits, kneels or bends over the inclined Spinner Plate platform, the Spinner turns round and round. Thanks to the inclination, this is no perpetual,

unstoppable movement, but a controlled one. Children will jump on and off, running the Spinner plate to a start, building bone density, muscles and motor skills. The sense of balance is hugely stimulated when spinning. This improves the equilibrium of the child, making it possible to e.g. sit still on a chair. A well developed sense of balance supports the child

in physical actions such as running or cycling. It gives great confidence to have an efficient sense of balance.
