The Tower with Fireman's Pole appeals immensely to children. With its climb and glide variation, children will try it out again, training cardio and muscles as they loop the Fireman's Pole and the varied access points. The inclined net access is a fun challenge to climb, and it trains the child's proprioception: the awareness of where the body parts are in space and how

much force and distance it takes to move securely. The sturdy stair-step is an even more challenging with its chunky-grip, vertical steps. The platform offers a nice view. The fireman's pole is dare devils favourite whilst also training the children's muscles, their spatial awareness and last but not least their bone density. This is built up for life mainly in childhood, through

weight bearing activities such as jumping and running.

攀爬网

身体素质：孩子们在倾斜的攀爬网上向上攀爬，有助于培养身体的交叉协调能力，从而影响左右脑协调，这对其他技能（如阅读能力）至关重要。绳网的不对称也锻炼儿童的攀爬能力。

Fireman's pole

身体素质：coordination is supported when going down, as well as arm and core muscles. Landing strengthens bone density, which is built for life in early childhood. **社交情感：**训练轮流意识和风险意识。

Ladder with rope

身体素质：cross coordination and eye-hand coordination are supported when children climb the ladder. Leg and core muscles are used intensely. Upper body muscles are developed when children pull themselves upwards in the rope. **社交情感：**培养轮流意识和合作意识。
