So many exercises can be done with The Step, it is one of the most simple yet highly versatile training tools. From simple step ups to plyometric jumps, with regular sessions it will provide both cardiovascular and muscular endurance. The Step incorporates upper and lower body movements which will improve balance and agility and constant push ups will increase leg strength.

Step, 20cm PU Steel

The support frame is $\varnothing 48.3 \times 4$ mm, carbon steel, with a hot-dip galvanised surface according to ISO1461, and a powder coating corrosion class C3 according to ISO12944-2. Lead content for surfaces is below 90ppm.

The polyurea coating, used on all grips, is highly durable against wear and tear, offers isolation and simultaneously gives users an outstanding grip during their workout.

A 5 mm hot-dip galvanised carbon steel plate must be moulded inside the SBR to offer optimal stability and optimise the mounting of the step to the frame.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
