

Steel Swing H:2.5m, 100cm Rope Seat

KSW92008

Of all the play activities, the bird's nest swing is the favourite: children love it, as it can be done individually and together. A great facilitator of fun rough-and-tumble play. The seat caters for multiple users of all abilities and most ages and makes it a thrilling, swinging common experience. Swinging, apart from being tremendous fun, trains the children's ABC:

agility, balance and coordination, as well as their spatial awareness. These motor skills are crucial to being able to judge distance and navigate traffic safely. Swings allow for standing sitting, laying and not least, jumping off. All these activities train the arm, leg and core muscles. The jumping off builds bone density; the majority of which is built up during

the first years of life. Finally, this swing supports social skills such as turn-taking and cooperation.

Steel Swing H:2.5m, 100cm Rope Seat

KSW92008

Bird nest swing

Physical: balance, coordination and spatial awareness are developed when swinging. The swinging movement trains the arm, leg and core muscles. **Social-Emotional:** the spacious seat allows for many children standing, lying, seated together and is inclusive for all. **Cognitive:** 'Cause and effect' understanding, rhythm and thinking skills are developed in younger children.

Steel Swing H:2.5m, 100cm Rope Seat

KSW92008

Vertical posts, swing frames end connectors and crossbeams can either be hot-dip galvanised steel or powder-coated on a pre-galvanised steel base. S

KOMPAN's swing hangers are heavy-duty and designed with stainless steel and anti-twist functions. The hangers attach to the cross beam on a welded bracket with two bolts. The bearings are embedded with silicone lubricant and need no further lubrication; ensuring low maintenance.

KOMPAN's bird's nest seats have been designed to be light in weight and compliant with global safety standards. The soft, shock-absorbent bumpers has a non-slip surface, making the swing seat extremely user friendly. You can choose between a rope version with reinforced PA rope or a moulded PE version.

The standard seats of KOMPAN swings are engineered for maximum safety and durability. The seat two component seat with a PP inner core and outside rubber is produced in one operation. The seats are available with swing chains of either hot-dip galvanised steel or stainless steel for all swings heights.

The swing hangers are made of high-quality UV-stabilised nylon (PA6) housing with integrated lifetime sealed ball bearings. The adjustable chains are fixed by a stainless steel hook with a theft-proof snake-eye bolt which is manufactured within an anti-twist house. All seats are fixed with two chains and are available with either standard or anti-wrap suspension.

KOMPAN has a range of uniquely designed seats for toddlers which includes; A rubber baby seat, a toddler PUR seat with four chain suspension for easy movement and cradle seat. Additional you can select the You & Me swing seat which is suitable for adult and child which allows two users to swing together while facing each other.

Item no. KSW92008-0910

Installation Information

Max. fall height	143 cm
Safety surfacing area	17.5 m²
Total installation time	4.5
Excavation volume	1.05 m³
Concrete volume	0.58 m³
Footing depth (standard)	90 cm
Shipment weight	213 kg
Anchoring options	In-ground ✓

Warranty Information

Steel post HDG	Lifetime
Swing Seat	10 years
Swing Hangers	5 years
Chains	10 years
Spare Parts Guarantee	10 years

Sustainability Data

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
KSW92008-0910	566.10	3.57	42.80

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
