

# Super Frisbee

COR17100

Item no. COR171001-1104	
General Product Information	
Dimensions LxWxH	20'3"x20'6"x6'11"
Age group	5 - 12
Play capacity (users)	30
Color options	

The Super Frisbee will immediately attract children and families to play, and the clever design will inspire variations in stretching, climbing, and navigating that will keep the family at play for a long time. The structure has something for everyone, at every angle. Everyone can be at the center of the play action. The varied access points provide

opportunities for children to strengthen their muscles through climbing, as they are rewarded by the thrill of navigating the height. There are points of differing challenge, that inspire children to return to the structure to challenge themselves each time. At ground level, people of all abilities can participate in the fun and the challenge, which supports a

positive attitude toward a healthy lifestyle for all.

# Super Frisbee

COR17100

## Membrane

**Physical:** the bouncy membrane develops the sense of balance when the child stands, steps or sits here. A faster way up, due to the extra support of the membrane. **Social-Emotional:** a meeting point for retreat from the rope landscape.

## Height

**Social-Emotional:** children develop courage and self-regulation when being up high. This positively impacts self-confidence.

## Ladder

**Physical:** cross coordination and muscle strength are developed when children climb the ladder. The climbing also supports leg and arm muscles.

## Rope with rubber disc

**Physical:** children develop cross-body coordination and muscle strength when stepping onto the disc and climbing the rope. Their sense of balance is trained when swaying gently. The sense of balance is important for instance for being able to sit still. **Social-Emotional:** socializing and turn-taking when deciding who should sit here.

## Horizontal small-mesh area, elevated

**Physical:** facilitate faster movements like running and developing balance. The height trains spatial awareness and adds thrill. **Social-Emotional:** taking a break with friends, sharing.

COR17100

Corocord ropes with 19mm diameter or more are special 'Hercules' - type with galvanized six-stranded steel wires. Each strand is tightly wrapped with PES yarn, which is melted onto each individual strand. The ropes are highly wear-and vandalism-resistant and can be replaced at site if needed.

Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector: safe, durable and vandalism-proof, all while allowing the typical movement of rope play structures.

The metal parts are made of high quality steel, hot dip galvanized inside and outside with lead-free zinc. On the outside, there is an additional layer of powder coating. This ensures both excellent corrosion resistance and colorful design expression.

Item no. COR171001-1104	
Installation Information	
Max. fall height	6'11"
Safety surfacing area	817ft²
Total installation time	22.6
Excavation volume	19.46yd³
Concrete volume	11.9yd³
Footing depth (standard)	3'7"
Shipment weight	2822lbs
Anchoring options	In-ground ✓
Warranty Information	
Corocord Rope	10 Years
EPDM components	2 Years
Membrane	2 Years
S-Clamps	10 Years
Spare Parts Availability	10 Years

Corocord membranes consist of friction-proof rubberized material of conveyor belt quality with excellent UV resistance. Tested and compliant with REACH requirements for PAH. Embedded is a four-layered armoring made of woven polyester. The armoring and the two surface layers result in a total thickness of 7.5 mm.

Fully colored EPDM rubber discs with smooth surface. The moulded EPDM surrounds a hot dip galvanized steel core that ensures both the stability of the discs and durable fixation to the rope.

The aluminium swages of the net are double conical with rounded ends and are as small as safety allows. The overall net design aims at keeping metal parts within the net to an absolute minimum, both in size and number, in order to provide the best possible rope climbing experience.

# Sustainability Data

COR17100

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
COR171001-1104	3,577.80	2.69	48.80

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

### Verification of CO<sub>2</sub> calculation of: Corocord

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
