The Balance net is a social attraction in the playground. It offers a welcome break from all of the energetic play in the playground and is a popular place for meeting and chatting. It can also be crawled on or walked across though, training balance and coordination. The balance net is made of natural Robinia timber, which provides an organic structure that can either

blend into or stand out from your surroundings. Children can touch and feel the timber while playing, observing how nature inspiration interacts with the built environment.

All organic Robinia products by KOMPAN are made of Robinia wood which is sourced from sustainable plantation farms. On request it can be supplied as FSC® Certified (FSC® C004450).

Nets and ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated to create a strong connection between steel and rope, which leads to durable weather resistance.

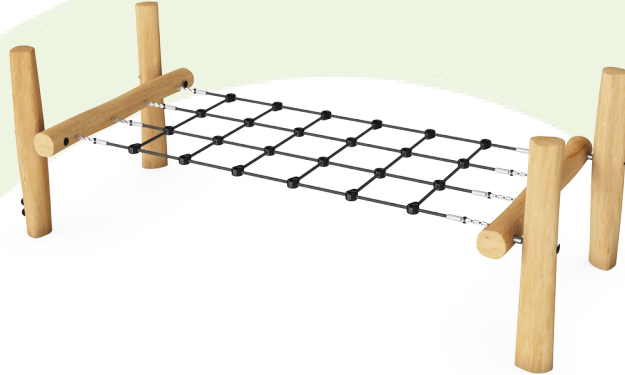

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
