

# Square Pull-Up Station

FSW218

The Square Pull-Up Station can be used in many ways and by multiple users at the same time. Exercises range from normal pull-ups to the most dynamic and advanced exercises such as the Flying Monkey, where you fly from one bar to another. The Pull-Up Bars are made from solid steel and have a diameter of 1.26 inches, which is an ideal size for both men and

women to have a good grip. The highest bar is connected at a height of 7' 8" where everyone will be able to hang freely. To make sure that everyone can reach the pull-up bars there are two stepping pods on the posts at different heights.

All KOMPAN fitness products are compliant with the ASTM F3101 & EN16630 Outdoor Fitness Standards. Load tests are performed as a static test by adding dynamic factors as well as safety factors to the specified load of 78kg per user. A product intended for 1 user is loaded with 420kg.

The information sign is made of a PA6 (Polyamide) and shows the most relevant exercise and a QR code. When scanned the QR code will link to an animated illustration of the exercise and offers the possibility of downloading the KOMPAN sport & fitness App, which will provide a large amount of exercises and workouts.

Steps are made of extruded aluminium with a non-skid surface. Aluminium has high corrosion resistance and ensures durability of the product. Steps have been mounted at heights of 34,7cm and 54,7cm this creates an easy access to reach the overhead activity

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
