

Saturn 4 Carousel

GXY958

Item no. GXY958000-3817

General Product Information

Dimensions LxWxH	316x316x253 cm
Age group	4 - 12
Play capacity (users)	4
Colour options	

The wildly thrilling Saturn Carousel is a irresistible play invitation for older children. With its four rope-suspended seats and its stable overhead handles, the Saturn Carousel can be pushed and pulled into a milder or wilder spin. This variation encourages repeated play for brave-hearts as well as more timid players. Socially, the Saturn Carousel trains

children's turn-taking and teamworking skills. It provides a place to hang when chatting. Physically, the pushing, pulling and running the carousel into motion train the upper and lower body muscles of the children. The heartbeat speeds up when running the carousel into motion. Last, but not least, the senses of balance and space get trained intensely when

standing, sitting or hanging in the arms while spinning, wildly or mildly.

Saturn 4 Carousel

GXY958

Rotation

Physical: pushing or pulling it into motion, children use their muscle strength and strengthen their cardio. The rotation develops the sense of balance and space when enjoying the ride. **Social-Emotional:** listening and negotiating how slow or fast to go, children develop their empathy and cooperation skills.

Teardrop handle

Physical: develop upper body muscles, when e.g. pulling yourself up or hanging in your arms.

PUR covered rope

Physical: firm grip when spinning and hanging from arms. Arm muscles developed when holding tight.

Dino seat

Physical: the three divisions and chains of the seat provide efficient handholds for both standing and seated swinging. **Social-Emotional:** the possibility of children swinging together, legs hanging down, trains cooperation, sequencing and turn-taking when swinging.

GXY958

Saturn ropes has six-stranded steel wires and a steel wire core. Each strand is tightly wrapped with PES yarn, which is melted onto each individual strand and made from +95% Post-consumer Materials. After initial friction has removed the surface fibres, a harder PES coating remains to protect each strand, making the ropes highly wear- and vandalism-resistant.

The special designed seat is made of a stainless-steel insert covered with a soft layer of PUR rubber. The seat is impact tested to fulfill all global playground standards and the rope has an ergonomic handhold of a 100cm long moulded on PUR rubber handle.

The two angled top handles are made of a moulded PP insert with an outer soft layer of TPV rubber. The handle is attached to the pipe with a galvanised steel inlay to ensure strength and durability.

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Heavy duty engineered bearing system with single row deep groove ball bearings with rubber seals. The fully closed bearing construction is lifetime lubricated and maintenance free.

Item no. GXY958000-3817	
Installation Information	
Max. fall height	0 cm
Safety surfacing area	0.0 m²
Total installation time	4.1
Excavation volume	1.20 m³
Concrete volume	0.80 m³
Footing depth (standard)	100 cm
Shipment weight	237 kg
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
Bearing construction	5 years
Hot dip galvanised steel	Lifetime
PUR components	10 years
Ropes & nets	10 years
Spare parts guaranteed	10 years

Elevated activities 0	Accessible elevated activities	Accessible ground level activities	Accessible ground level play types
Present	0	1	1

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: GXY916012-3417.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
