Multisportpalen (10 m net)

FRE3030

Netten en kabels zijn gemaakt van UV-bestendig PA met interne staalkabelversterking. De kabel is behandeld om een sterke verbinding te creëren tussen staal en kabel, wat leidt tot een goede slijtvastheid.

The net is secured with rope clamps (DIN741) at the top using a 3mm steel cable which is covered with 1mm Green tubing. The cable ends are closed using an aluminum talorit creating a fastening loop with a diameter of 10mm.

All steel components are manufactured from carbon steel, welding's according EN ISO 5817 & Hot dip galvanised (HDG) according to ISO1461. This process ensures good protection in all circumstances.

Pole tops are molded of thermoplastic rubber (TPV) with a steel inlay. TPV is highly durable against wear and tear, and the steel inlay secures durability.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
