

Starfish

M584

The Starfish table creates a nice gathering point in any play area. With its five arms, the Starfish will accommodate items from up to five children at any one time. Toddlers often bring things with them to the playground, and the possibility of storing them is always welcome. The Starfish also functions very well as a point for creative experiments, for instance building

with sand. Last but not least, the Starfish can also function as a handy seat.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
