

# Swing Frame, 4 seats

NRO924

A harmonic design of play frames attracts attention. Swinging in the stable, solid framework of the Kompan Swing Frame increases the feeling of security and thus increases the force, concentration and energy that the child dare put into swinging. The more stable, the more play intensity. So children will come back to enjoy the timeless experience of

swinging, again and again, benefiting the development of balance and coordination. Adding more seats in a swing frame motivates and enhances social play and cooperation.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
