The stretch station is excellent for strength and stretch exercises for all difficulty levels. Shoulders and torso can be stretched in all relevant angles independently of individual flexibility. Lower limbs can be stretched by placing the feet on the lowest bars or, on the ground with hand support on the bars. For more challenging stretches, feet can be placed

on higher bars. Also, when physiotherapists are involved, the stretch station is a perfect mount for elastic bands.

The information sign is made of a PA6 (Polyamide) and shows the most relevant exercises. When users scan the QR code, this will link them to an animated illustration of the exercise and offers the possibility of downloading the KOMPAN Fitness App, which is programmed with many more exercise alternatives.

The connectors are made of die-cast aluminium, specially alloyed for the outdoor environments and heavy usage. The screws attaching the connectors are stainless steel and protected by zinc washers.

Handrail intended as grips during exercises are made of hot-dip galvanised steel  $\varnothing 38\text{mm}$ , a great diameter for a good grip and to support the wrist. The height of the handrail is 940mm from the top of the HPL plate. The distance between the rails is 900mm.
