

Toddler Seat H:2.5m

SW990031

The Toddler Seat is a truly unique swing invention that makes it possible for toddlers to swing and develop the cross-coordination skills that conventional swinging takes. When seated, the toddler can push and pull the front chains and set the seat in motion. This is a fabulous event for toddlers, who have a strong drive to do things on their own, but often need

help. The feeling of independence is priceless to young toddlers and it boosts their self-confidence. Apart from being great fun, swinging on the Toddler Seat trains important gross motor skills such as the sense of balance when seated. A truly social-emotionally as well as physically stimulating swing seat.

Toddler Seat H:2.5m

SW990031

Roomy seat with hole for legs

Physical: the seated position supports trunk stability and balance when pushing and pulling the front chains. **Social-Emotional:** the supportive carved hole for the legs provides a feeling of security when seated. The opening facilitates lifting the child into and out of seat.

Front chains

Physical: pushing and pulling chains requires coordination and trains muscles. **Cognitive:** the insight that the child can affect motion with body movements strengthens logical thinking and the understanding of 'cause and effect'.

Toddler Seat H:2.5m

SW990031

KOMPAN's curved toddler seat is made with an insert of 21.25 mm thick plywood from alder and pine wood. The outside layer is moulded in UV stabilised PUR which retains its properties within temperature ranges of -30°C to 60°C

The double steel yoke suspension provides the unique parallel movement of the seat. The swing hangers are manufactured with high-quality UV stabilised nylon (PA6) which include integrated lifetime sealed ball bearings. The adjustable height chains are fixed by a stainless steel hook, snake eye bolts which are then encased within anti-twist and vandalism proof housing units.

The four PUR rubber elements at the end of each chain support the back and forth movement of the seat, which is initiated by the toddler sitting on the seat.

The seats and swing heights are available with either, hot-dip galvanised steel or stainless steel chains.

Item no. SW990031-00	
Installation Information	
Max. fall height	146 cm
Safety surfacing area	14.5 m²
Total installation time	1.3
Excavation volume	0.00 m³
Concrete volume	0.00 m³
Footing depth (standard)	0 cm
Shipment weight	24 kg
Anchoring options	
Warranty Information	
Chains	10 years
EPDM Components	2 years
Spare Parts Guarantee	10 years

Sustainability Data

SW990031

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
SW990031-00	65.40	3.84	34.80

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: KSW92011-0910.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
