The cover protects all the moving parts from vandalism and entrapments. The cover is made of 5mm rotomolded LLDPE, Linear low-density polyethylene, with excellent impact strength and usable within a large temperature span.

The resistance unit and all mechanical stops are hidden in the fully closed cabinet. As a result, entrapment is not possible, making it extremely safe to use and providing protection against the elements. The products are EN 16630 certified and comply with the ASTM F3101 for unsupervised outdoor fitness equipment.

The input shaft is Ø101,3 x 2,9mm S355 Hot Dip Galvanized and Powder-coated steel. The bearing house is Caste Aluminum (EN AB-44100 / EN AB-AISI12(a)) with self-aligning sealed ball bearings. An extremely strong and durable construction
