

Balance Station

FPW227

The Balance station trains ankle strength and stability. The four items in the station will have different difficulty levels that allows for progression and a challenge for every user type. At the same time, the placement of the four stations around the ring invites to moderate social interaction. Wobble trains ankle control and flexibility. It is present in two

difficulty levels. One that is stable and limited in its range of motion and one that is livelier and more dynamic. Rotation can be used for rotational flexibility of the torso and for lower limb balance and control standing on one or two feet. Half ball provides a fixed and stable platform to train ankle strength and flexibility.

Item no. FPW22700-0900	
General Product Information	
Dimensions LxWxH	202x198x124 cm
Age group	8+
Play capacity (users)	4
Colour options	

Balance Station

FPW227

Wackie step

Physical: sense of balance and space, and training of posture. Important for being able to sit still.

Balance Station

FPW227

The double ROSTA element is made of casted iron and hot-dip galvanized before being painted. This ensures that the ROSTA element is a maintenance-free, elastic joint which can move in 250 degrees in any direction. Both wobbles have different stiffness and differences of 45%.

The bearings used in the twist are slide bearings. These are made from extremely strong polyoxymethylene which is low wearing, highly mechanical, moisture absorbant and provides high abrasion resistance.

The half ball is $\varnothing 500 \times 250$. The material is SBR granular rubber, recycled SBR (Styrene Butadiene Monomer, Synthetic Rubber) UV stabilised to a maximum without the use of heavy metal stabilisers, for optimal grip during jumping and stepping exercises under all weather circumstances.

The $\varnothing 414$ mm top plate is made from 15mm Ekogrip®, a 15mm PE plate with a 3mm top-layer of thermoplastic rubber with non-skid effect. The height is 217mm and the range of motion is $\pm 90^\circ$, with a EPDM rubber stop at each end.

Handrail intended as grips during exercises are made of hot-dip galvanized steel $\varnothing 38$ mm, a great diameter for a good grip and to support the wrist. The height of the handrail is 940mm from the top of the HPL plate. The distance between the rails is 900mm.

Item no. FPW22700-0900

Installation Information

Max. fall height	25 cm
Safety surfacing area	18.0 m ²
Total installation time	4.6
Excavation volume	0.58 m ³
Concrete volume	0.28 m ³
Footing depth (standard)	90 cm
Shipment weight	223 kg
Anchoring options	In-ground ✓ Surface ✓

Warranty Information

Bearing Construction	5 years
Galvanised Steel	Lifetime
Post	10 years
ROSTA Element	2 years
Spare Parts Guarantee	10 years

Sustainability Data

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
FPW22700-0900	415.00	2.57	55.60

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Fitness

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
