

Rhombus Twister

COR20340

This Twister's rhombus-shaped rope attracts children to spin, rotate and climb to the top, and do it over and over again. It provides play for children and encourages social play across different age groups. It's a particular favourite of older children who can stand, sit and chat while spinning and seeking out challenging play. The Twister's fixed rings create an

opportunity for more children to rotate the Twister from the outside. The two rings provide good support for sitting, hanging by their arms, or standing, for many children, while rotating. This is a great thrill and it develops children's motor skills, muscle strength and bone density when they climb, jump, push, pull and hang by their arms. The negotiation of who does what to

turn the Rhombus Twister net trains social-emotional skills such as turn-taking, tolerance and empathy. This is a playful way to make friends.

Item no. COR203401-1108	
General Product Information	
Dimensions LxWxH	171x171x289 cm
Age group	5+
Play capacity (users)	10
Colour options	   

Rhombus Twister

COR20340

Climbing net

Physical: the net allow for climbing and crawling, supporting proprioception, cross-coordination and spatial awareness and strength. **Social-Emotional:** the net allow more children being seated together, sharing.

Big meshes

Physical: the big meshes allow for climbing and crawling, supporting proprioception, cross coordination and spatial awareness. **Social-Emotional:** allow more children being seated together, sharing.

0

Physical: the rotation develops the sense of balance and space, children use their muscle strength and strengthen their cardio. **Social-Emotional:** listening and negotiating how slow or fast to go, children develop empathy and cooperation skills.

Rhombus Twister

COR20340

Corocord ropes with 19mm+ diameter are known as a 'Hercules' rope type which is formed from galvanised six-stranded steel wires. Each strand is tightly wrapped with PES yarn, which is melted onto each individual strand. Ropes are highly wear-and vandalism-resistant and can be easily replaced on-site if needed.

Designed to allow the typical function of rope play structures to move Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector. Our clamps are safe, durable and vandalism-proof.

Heavy duty engineered bearing system with single row deep groove ball bearings with rubber seals. The fully closed bearing construction is lifetime lubricated and maintenance free. The Bearing system has an integrated drag brake according to global safety standards.

All decks are supported by a unique steel construction with multiple deck supports and fixations. The HPL decks with a thickness of 17.8mm have a very high wearing strength and feature a unique KOMPAN non-skid surface texture.

The steel posts are hot-dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Item no. COR203401-1108

Installation Information

Max. fall height	287 cm
Safety surfacing area	46.7 m²
Total installation time	7.2
Excavation volume	1.10 m³
Concrete volume	0.70 m³
Footing depth (standard)	110 cm
Shipment weight	535 kg
Anchoring options	In-ground ✓

Warranty Information

Corocord (Hercules) Rope	10 years
Galvanised Steel	Lifetime
HPL Decks	15 years
Movable Parts	2 years
Spare Parts Guarantee	10 years

Sustainability Data

COR20340

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
COR203401-1108	699.30	2.81	47.90

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Corocord

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
