

Cableway, sloping ground, slide length 25m

M87211

Item no. M87211-3817

General Product Information

| | |
|-----------------------|---|
| Dimensions LxWxH | 3320x300x295 cm |
| Age group | 4+ |
| Play capacity (users) | 1 |
| Colour options |  |

The Large Cableway is the ultimate dare devil attraction. It may attract less evident risk profiles too: with its length and supportive seat and handhold, anyone can participate. And they will, again and again. The reason for this immense holding power lies mainly in the immense thrill of gliding through the air. The feeling of weightlessness and the floating

through the air at speed trains spatial awareness as well as the child's understanding of gravity, space and speed. This is necessary e.g. in managing traffic safely. The social skills get trained as children diligently hand back the seat to the next user in line. The running and pulling involved in this trains the child's cardio as well as upper body muscles.

All in all, the large cableway is an asset of play that unites generations and abilities as there is some way for almost everyone to use it.

Cableway, sloping ground, slide length 25m

M87211

Dino seat

Physical: the three divisions and chains of the seat provide efficient handholds for both standing and seated swinging. **Social-Emotional:** the possibility of children swinging together, legs hanging down, trains cooperation, sequencing and turn-taking when swinging.

PUR covered rope

Physical: firm grip when spinning and hanging from arms. Arm muscles developed when holding tight.

Long line

Physical: the lengthy glide through the air adds to the thrill and trains spatial awareness, trunk stability and upper-body muscles. All this helps support the child's physical self esteem, making e.g. positive risk taking easier.

Cableway, sloping ground, slide length 25m

M87211

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The special designed seat is made of a stainless-steel insert covered with a soft layer of PUR rubber. The seat is impact tested to fulfill all global playground standards and the rope has an ergonomic handhold of a 100cm long moulded on PUR rubber handle.

The high-quality steel cable with a diameter of 12mm is designed for heavy usage of the cableway for many years. The starting point is indicated by a knob. At the stop point there is special designed spring device ensuring a softer stop of the puller.

The steel cable 3 is tensioned by a special designed device. By turning the handle 1 the steel cable can be tensioned according to instruction in a safe way. After tensioning the cable is locked by three clamps 2. The tensioning device can also be used for adjustment during annual inspections.

Item no. M87211-3817

Installation Information

| | |
|--------------------------|----------------------|
| Max. fall height | 100 cm |
| Safety surfacing area | 118.9 m ² |
| Total installation time | 10.1 |
| Excavation volume | 6.36 m ³ |
| Concrete volume | 1.54 m ³ |
| Footing depth (standard) | 100 cm |
| Shipment weight | 361 kg |
| Anchoring options | In-ground ✓ |

Warranty Information

| | |
|--------------------------|----------|
| Cable | 10 years |
| Hot dip galvanised steel | Lifetime |
| Movable parts | 2 years |
| PUR components | 10 years |
| Spare parts guaranteed | 10 years |

Sustainability Data

M87211

| Cradle to Gate A1-A3 | Total CO ₂ emission | CO ₂ e/kg | Recycled materials |
|----------------------|--------------------------------|-------------------------|--------------------|
| | kg CO ₂ e | kg CO ₂ e/kg | % |
| M87211-3817 | 934.80 | 2.61 | 49.80 |

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: KSW92011-0910.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
