

# Play Tower with Swing, 2 Seats

PCM110721

This play tower with a swing enhances physical play with opportunities for children to move their bodies by climbing, stretching, sliding, and swinging. The structure motivates children by providing a variety of play activities for physical, social, and cognitive play. The Rappel climber strengthens muscles and helps to develop cross-coordination skills. This

enhances a child's ability to use both sides of their brain, and supports the internal structures that enable reading and thinking. Sliding is immensely thrilling and also supports posture and balance. They are the basis for many other physical skills and help to build up confidence to navigate the world securely. Swinging is a favourite playground activity that instantly

attracts children. The two swing seats will provide hours of social interaction and fun.
