

# Two Towers with Bridge

NRO2002

The Two Towers with Bridge has lots of climb and glide variations, so children will want to try it out again and again. They will train their cardio and muscles as they loop the slide and the varied climb access points. The inclined net access is a fun challenge which trains the child's proprioception: the awareness of where the body parts are in space and how much force

and distance it takes to move securely. The rope ladders are even more challenging with their swaying vertical steps. The bridge trains sense of balance, the fundamental motor skill that make children confident when moving and is important for the ability to sit still and concentrate. On the platforms and the bridge, children socialise and learn how to take turns.

The banister bars offer a thrilling way down, training the sense of space and the proprioception.

Item no. NRO2002-1001

## General Product Information

Dimensions LxWxH	589x300x400 cm
Age group	6+
Play capacity (users)	13
Colour options

NRO2002

## Rope ladder

**Physical:** cross coordination is supported when children climb the ladder. The climbing also trains leg and arm muscles. **Social-Emotional:** place for meeting, taking a break and socializing.

## Climbing net

**Physical:** the inclined net supports the upward climbing movement of the body. The net supports cross-body coordination, which impacts coordination of the right and left part of brain, fundamental for other skills such as the ability to read. The asymmetry of the net challenges the children's climbing.

## Ladder with rope

**Physical:** cross coordination and eye-hand coordination are supported when children climb the ladder. Leg and core muscles are used intensely. Upper body muscles are developed when children pull themselves upwards in the rope. **Social-Emotional:** learning about turn taking and cooperation.

## V-net bridge

**Physical:** balancing across the beam develops the vestibular system as well as cross coordination. **Social-Emotional:** passing other children takes co-operation and teaches children turn-taking skills.

## Banister bars

**Physical:** coordination is supported when going down, as well as arm and core muscles. Landing strengthens bone density, which is built for life in childhood. **Social-Emotional:** turn-taking and risk-taking.

NRO2002

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

The product/activities are preassembled from the factory to ensure all safety requirements are considered.

Ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made from +95% post-consumer materials and is inductively melted onto each strand.

Item no. NRO2002-1001	
Installation Information	
Max. fall height	200 cm
Safety surfacing area	39.6 m²
Total installation time	18.0
Excavation volume	2.05 m³
Concrete volume	0.46 m³
Footing depth (standard)	100 cm
Shipment weight	959 kg
Anchoring options	In-ground ✓
Warranty Information	
Robinia wood	15 years
Ropes & nets	10 years
Spare parts guaranteed	10 years
Stainless steel components	Lifetime
Stainless steel components	Lifetime

The stainless-steel activities are made of high-quality stainless steel. The steel is cleaned by a total pickling process after manufacturing to ensure a smooth and clean gliding surfaces.

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

# Sustainability Data

NRO2002

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
NRO2002-1001	436.90	0.57	5.10

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Nature play

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
