PCM0013

This large magnetic white board will support hours of play and learning in an outdoor learning environment or playground. The large space is plenty for many children to join in, which will help them to develop fine motor skills when drawing, and language and literacy skills when making signs. The large size supports social play, because there is plenty of room for

interaction and cooperation. White boards can have direct benefits for learning, and they also enhance a variety of dramatic play scenarios, from playing school to making a sign for treasure hunting games. There are cognitive benefits to drawing and leaving your mark, because it stimulates brain development. The magnetic feature can also spark conversations

about the magnetic properties of objects. All around fun for curious minds!

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
